Join PET1, a one-day course designed to support you to better diagnose and treat children with epilepsy. Through a combination of lectures and interactive workshops, our team of Consultant Paediatric Neurologists will teach you to:

- Define: seizure, epilepsy, epilepsy syndrome and be able to provide a simple classification of epilepsy
- Describe the different seizure types e.g. absence, myoclonic, tonic clonic, tonic, atonic, focal motor and focal sensory
- Give differential diagnosis for seizures, thus distinguishing epilepsy from syncope and non epileptic events
- Manage the first seizure event
- Appreciate the contribution made by EEG and neuro-imaging
- Describe the principles of treatment, the indication for anti-convulsants and the well-known side effects of these drugs.
- Offer practical advice for parents and children with epilepsy

Who is this course for?

PET1 is suitable for all health care professionals providing primary or secondary level care for children with paroxysmal episodes.
